## Frontend Developer Intern | Web Developer

Passionate and detail-driven **Frontend Developer** with a proven track record of crafting dynamic and intuitive websites. Adept at building visually stunning and user-friendly interfaces using **HTML, CSS, Tailwind CSS, JavaScript, React JS**, and **WordPress**. Excels in creating seamless e-commerce experiences with **Elementor** and **WooCommerce** while prioritizing mobile responsiveness and optimizing user experiences. Enthusiastic about leveraging academic knowledge and technical expertise from a **BS Software Engineering** program at Virtual University to drive innovative solutions. Thrives in collaborative freelance environments, delivering tailor-made solutions that exceed client expectations.

## WORK EXPERIENCE

**Upwork, Fiverr, Freelancer.com • Remote • 02/2024 – Present**

**Frontend Web Developer/WordPress/HTML/JS/React/CSS/Tailwind CSS/Elementor Expert • Freelancer**

- As a Front-End Developer, I specialize in creating responsive and visually appealing websites using HTML, CSS, Tailwind CSS and JavaScript, with a strong focus on React for building dynamic user interfaces. My experience extends to WordPress development. Collaborated with clients to gather requirements, deliver custom themes, and implement interactive features using **Elementor** and custom code. Enhanced website performance and responsiveness, ensuring seamless user experience across devices. Debugged and resolved HTML, CSS, and JavaScript issues to improve functionality.

## EDUCATION

**Degree in BS Software Engineering**

Virtual University of Pakistan

## PROJECTS

### Task Tracker App

Built a React-based app with a dynamic UI, task completion chart, and integration with a JSON-based API.

Custom API: Built to handle fetching, reading, writing, and updating data efficiently.

Task Management: Start and stop timers for tasks, delete tasks, and stay organized.

Interactive Charts: Leveraged Chart.js to visualize daily and weekly task stats beautifully.

Tailwind CSS: Styled with Tailwind CSS, ensuring a clean and modern design.

Responsive Design: Fully optimized for seamless use across all devices.

Fully Deployed: Accessible online for everyone to explore!

## Netflix Clone

Designed and developed a responsive React web application using the TMDB API to fetch and display real-time movie and show data.

## Weather App

Developed an interactive and responsive weather application using **JavaScript** and **OpenWeatherMap API**. The app fetches real-time weather data based on user input, displaying details such as temperature, humidity, wind speed, and weather conditions. Implemented a clean and user-friendly interface with dynamic updates for an engaging user experience.

## E-Commerce Web Application

Developed a responsive and dynamic e-commerce website using **React.js** and **Tailwind CSS**. Designed a mobile-responsive interface to ensure seamless usability across devices. Implemented key features like product listing, filtering, and a cart system, using custom data to simulate real-world e-commerce functionality. Focused on performance optimization and a visually appealing design for enhanced user experience.

## Quote Generator App

Created an interactive quote generator application utilizing **React.js**. Integrated with an external API to fetch and display dynamic quotes. Features include real-time data rendering and a sleek user interface. Emphasized code modularity, API integration, and smooth user interactions.

## SKILLS

APIs Integration, Basic SEO and Performance Optimization

**Frontend Development:** CSS, HTML, JavaScript, React JS, Tailwind CSS

**CMS Platforms:** Elementor, WooCommerce, WordPress

**Version Control:** Git/GitHub

**Responsive Design:** Mobile Optimization and Cross-browser Compatibility

**E-commerce:** Development and Customization

**Debugging & Optimization:** Performance Tuning and Issue Resolution
